

I want to see XM left alone, because I use the traffic channel often. I travel between orlando and melbourne frequently and the XM traffic channels have saved me time and aggravation on many occasions. I pay for these channels and feel that they should left alone. It is trivial at best to remove weather and traffic from sattelite radio, the NAB and FCC should be more concerned with removing inappropriate content from television and movies. Leave XM alone and address real issues like the content on primetime television. Because there are much more pressing issues facing the FCC and NAB than traffic and weather. Thanks for your time,

Joe McLellan.
